Project Title: Berserk Website

I would like to create this website as a multi-page website to introduce one of my favorite manga - Berserk by Kentaro Miura. Plenty images and words contents will be included. Including some information online and my own interpretation to the story.

- **Home Page/Introduction:** This page will be the home page of the website. A warning sign page will show to let the viewer know this is a 18+ manga.

- **Story:** This will be the page that shows the storyline of Berserk chronologically. It will be basically a description of the plot.

- **Characters:** This will include most of the characters from the story. Because there are too many of them, I might just have to make one or two main characters for the character content page.

- **Legacy:** This will be the page that introduce the legacy of this manga since Kentaro Miura passed away in 2021. It will also talk about its influence to the media culture and video game culture.

- **Sources:** This will be the source page.
